Frequently asked Questions

What's the difference between HMW and UHMW?

HMW stands for High Molecular Weight plastic. This type of plastic is used in bedliners that take minimal abuse and non-abrasive loads like dirt, clay, sludge, mulch, grain, etc.

UHMW stands for Ultra High Molecular Weight plastic. American Made, LLC manufactures its RE-PRO Heavy Duty Bedliners from UHMW plastic.

Then aren't all UHMW bedliners alike?

No. While competitors may try to tout their product as "just as good as RE-PRO," the fact is that many bedliners are made from reprocessed UHMW, which includes scrap plastic or fillers.

RE-PRO is not reprocessed ...it is specially formulated with impact modifiers to create the most durable, impact- and abrasion-resistant bedliner available anywhere. A significant amount of technical research has gone into the development of RE-PRO, ensuring that the polymer chains that make up our polymer (plastic) are crosslinked. Crosslinking makes plastics stronger; a sort of front-line defense against impact, abrasion and weather changes.

If RE-PRO is so strong, does it carry a warranty?

Yes. American Made, LLC guarantees RE-PRO Bedliners against cracking, breaking or shattering up to half the thickness of the liner, unlike other bedliner manufacturers who warranty their material for only a specific time period.

Can I afford a RE-PRO Bedliner?

It's like the saying goes, "You can't afford not to have a RE-PRO Bedliner!" RE-PRO's unsurpassed durability, superior stick release and comprehensive warranty add value to your dump truck or trailer, keeping your dump equipment out of the repair shop and on the job.

American Made, LLC Specializes in Liner Systems for:

- Dump Trucks/Trailers
- Roll-Offs
- Bins & Hoppers
- Waste Hauling & Recycling Equipment
- Hopper Bottoms
- Van Bodies
- Speciality Plastic Parts
- Farm Equipment

Other quality products from American Made, LLC:

- BLACK FIRE High-Temp Hot Asphalt/Rock Liners
- SOLID GREASE Disc (Round Disc with Snap Ring)
- Final-Lube SOLID GREASE Plate (Permanent 5th Wheel Lube Pad)
- Bins/Hopper Liner Sheets

RE-PRO[®] BEDLINERS

For Heavy Duty Hauling Applications.

The toughest, longest lasting bedliner system in the industry.

Leading the way with over 20 years experience in plastics and trucking, American Made, LLC created the bedliner industry and is the recognized World Leader in Dump Liner Technology.

The RE-PRO[®] Heavy Duty Bedliner System is not just UHMW plastic, it's specially formulated with impact modifiers for superior resistance against even the most abrasive loads.

“We run 30 gravel trailers out of here every day, and there’s a RE-PRO[®] Liner in every one of them. In fact, our RE-PRO[®] Liners have been known to last nine or ten years – that’s the kind of durability we depend on, that’s why we depend on RE-PRO[®]. It’s not our first choice, it’s our only choice.”

Joe Skameria

Troy Aggregate Carriers, Inc.
Sterling Heights, MI

RE-PRO[®] Liner Systems are designed for heavy duty hauling, such as gravel, rock, coal, sand, limestone, fly ash and more.

RE-PRO[®] Bedliners enable you to haul more loads, more efficiently, and with less carry-back, resulting in a more profitable return.

Custom-made to fit your dump truck or trailer, RE-PRO[®] Bedliner Kits are easy to install. They come prefabricated to your dimensions with fasteners, hardware, tooling, metal edge protectors, and easy installation instructions. With RE-PRO[®] you will:

- Dump quicker and cleaner
- Eliminate digging out stuck loads
- Unload at lower scopes
- Reduce your risk of roll-over
- Reduce or eliminate the costs of reflooring
- Experience less sticking and freezing!

Advantages you can count on

- Proven in the field for over 20 years
- Outlasts aluminum beds, while providing the advantages of plastic
- Lightweight, yet won't crack, break or shatter to 200° below zero
- Withstands high impact, and is more abrasion resistant than aluminum
- Exceptional stick-release – less chance of roll-overs

Options & Accessories

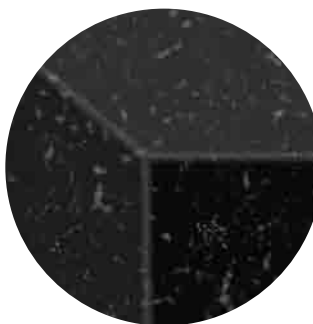

- Wall Liner Kits
- Thick Tail (for extra abrasion protection in rear)
- Dog Box Kits
- Nosewrap Kits
- Tailgate Kits
- Pusher Blocks
- Tarp Rail Strips

Not just for trucks, we also have systems for

- Containers
- Bins & Hoppers
- Farm Equipment
- Waste Equipment
- Articulated Vehicles
- Specialty Applications

RE-PRO® Professional Grade UHMW.

Unlike many other UHMW plastics, RE-PRO is not reprocessed. RE-PRO is reformulated with exclusive additives that give it superior strength and greater slickness than other UHMW materials. This process crosslinks RE-PRO's polymer chains creating the most durable bedliner material manufactured anywhere.

Only RE-PRO® contains a special impact modifier that adds strength and durability (shown actual color)

“We really appreciate the superior slick release of your product... With RE-PRO®, I know I can dump much more safely, as the loads seem to just glide out, allowing my drivers to dump at much lower scopes.”
